

CliNe - Clickbait News Detector User Guide

1. Introduction

CliNe is a Chrome extension that helps you identify clickbait news titles while browsing news websites. This user guide will walk you through the installation process and explain how to use the extension effectively.

2. Installation

2.1 Installing the Chrome Extension

- Ensure you have Google Chrome installed on your computer.
- Go to the Chrome Web Store and search for "CliNe - Clickbait News Detector".
- Click on the "Add to Chrome" button to install the extension.
- Once installed, the CliNe icon will appear in the browser toolbar.

2.2 Running the API Locally

- Clone the repository from the provided GitHub link: [GitHub Repository URL].
- Open the API folder, "app.py", in a code editor such as Visual Studio Code.
- Install the necessary dependencies by running the command: `pip install -r requirements.txt`.
- Run the API file by executing the command: `python app.py`.
- The API will be hosted locally on your device that link you have to paste in extension file for API link.

3. Enabling and Disabling the Extension

- To enable CliNe, click on the CliNe icon in the browser toolbar. The icon will turn blue, indicating that the extension is active.
- To disable CliNe, click on the CliNe icon again. The icon will turn gray, indicating that the extension is disabled.

4. Detecting Clickbait News Titles

- When you visit a news website, CliNe automatically analyzes the news titles on the page.
- If a title is identified as clickbait, CliNe will display a pop-up message alerting you to the clickbait nature of the title.
- You can click on the pop-up message to view more details about why the title is classified as clickbait.

5. Reporting False Positives or False Negatives

- If you come across a title that you believe is misclassified by CliNe, you can report it.
- Just mail you misclassified content with reason on below given support email ID.
- Your feedback will help improve the accuracy of CliNe in future updates.

6. Installing the Extension Folder in Developer Mode.

- Open Google Chrome and go to the Extensions settings by typing "chrome://extensions/" in the address bar.
- Enable the Developer mode by toggling the switch in the top right corner.
- Click on "Load unpacked" and navigate to the folder containing the extension files.
- Select the extension folder and click "Open" to install it.
- The CliNe extension will be added to your browser in Developer mode.

7. Uninstalling the Extension

- To remove CliNe from your browser, right-click on the CliNe icon in the browser toolbar.
- Select "Remove from Chrome" to uninstall the extension.

Note: CliNe is designed to assist users in identifying potential clickbait news titles, but its accuracy may vary. It is recommended to exercise critical thinking and verify the credibility of news articles through additional sources.

This user guide provides an overview of CliNe's installation, usage, customization, and reporting features. We hope this guide helps you effectively utilize the CliNe extension to
